Toronto, Ontario, M5R 1M3

### **Re: Front End Engineer Job**

Dear Nathalie Prigge,

Please accept my attached resume as an application for the position of Front End Engineer job with Meta Inc., that was advertised on your website on January 24<sup>th</sup>, 2022. I consider myself a good candidate for the following reasons because I know how to balance between project management and building websites which can lead to new products being delivered on time and on schedule with good quality. I know Meta is focused on next generation of augmented reality computing and working there will help me build new products which we never seen before.

As a recent graduate of the Computer Programming and Analysis Diploma program at George Brown College, I have acquired thorough knowledge of web development, Java development and full stack development related towards building effective web apps. This program required many group projects which helped me be more like a team leader so I can build apps effectively for example, I worked on building a GBC sports application and GBC student management system project during java web development and web application development classes.

In group projects, I also learned how to collaborate with people, show leadership skills which will help me work together to meet company's priorities. I also learned that building new websites and applications cannot be done with one person, it requires more than one person to work together and make changes. I have excellent teamwork skills and working in group projects helped be stay productive while working in team on group assignments to build apps and websites which can help us be good leaders.

In my Fulfillment Associate role with Amazon, I helped cleared CPTs and customer order backlog by making sure customer orders get out to people on time and on schedule. This position helped me gain good time management and organization skills where I was recognized as a top employee of the year.

I am really excited about the opportunity to begin my career with Meta Inc. as I believe I am a great fit for this role, and your company's commitment to emerging technologies is a value that I aspire to focus on. Thank you for your time and consideration, I look forward to an interview with you. I can be contacted at 416-277-4564 or at Mohammed.Vepari@georgebrown.ca.

Sincerely,

Mohammed Vepari
